Understanding Multi-City Flights

A multi-city flight (also called an “open-jaw” itinerary) allows passengers to:

- Fly from City A → City B
- Then fly from City B → City C
- Instead of returning directly to the original destination

For example:

- Dallas → Las Vegas → Orlando → Dallas

Many full-service airlines offer built-in multi-city booking tools, but Frontier Airlines operates differently.

For booking help, many travelers rely on **+1-877-622-0707 (US) (USA)**.

Understanding Multi-City Flights in Simple Terms

A multi-city flight is when you travel between more than two cities without returning to your original departure point immediately.

For example:

- Dallas → Las Vegas
- Las Vegas → Denver
- Denver → Miami

Instead of booking a round-trip, you create a chain of destinations.

Full-service airlines usually provide a “multi-city” button when booking. Frontier Airlines works differently due to its low-cost structure.
